Entity	oeo:OEO_00390071	has study descriptor tag
Definition	has study descriptor tag is a relation between a scenario bundle and an oeo class which is used as a study descriptor.	
Remark	The classes in the domain are annotated with <i>oekg</i> in the OEO and are manually chosen.	
Domain	Objects have to be one of the entries in range.	
Range	oeo:OEO_00020227	scenario bundle
	oeo:OEO_00000143	electricity grid
	oeo:OEO_00000199	greenhouse gas emission

	Label	
Entity	oeo:OEO_00020439	covers sector (shortcut)
Definition	A relation between a scenario bundle and a sector that is covered by the study the scenario bundle is about. It is a shortcut relation, see elucidation and associated	

sparql axiom.

This is a shortcut relation to relate 'scenario bundle' to 'sector'. The original relation 'covers sector' relates 'study' (process) to 'sector'.
The shortcut relation should be used to represents these statements:
('scenario bundle 'is about' some 'scenario study') and ('scenario study' 'covers sector' some 'sector')

Remark

Any subclass of sector plus their individuals are allowed but currently only individuals are used.

Objects have to be one of the entries in range.

	Label	
Entity	oeo:OEO_00390078	has reference
Definition	has reference is the relation between a continuant and a reference that points to a relevant resource to the continuant.	
Remark	Links to documents or other ontologies are stored here.	
	Objects are an URI of the type specified in the range.	
Domain	oeo:OEO_00020012	study report
	oeo:OEO_00020036	interacting region
	oeo:OEO_00020032	study region

Range	oeo:OEO_00000353	reference
--------------	------------------	-----------

Label		
Entity	oeo:OEO_00390095	has uuid
Definition	has uuid is the relation between a factsheet or report and the 128-bit label used to identify it in a computer system.	
Remark	Uuids are used for internal workings with the oekg.	
Domain	oeo:OEO_00020012	study report
	oeo:OEO_00000365	scenario factsheet
	oeo:OEO_00020437	has information input (shortcut)
	oeo:OEO_00020436	has information output (shortcut)
Range	Literal (string)	

Label		
Entity	oeo:OEO_00000506	has author
Definition	A relation that holds between an information content entity and its author.	
Remark	Objects are an URI of the type specified in the range.	
Domain	oeo:OEO_00020012	study report
Range	oeo:OEO_00000064	author

Label		
Entity	oeo:OEO_00390096	has publication date
Definition	has publication date is the relation between a report and the year it was published in.	
Remark		
Domain	oeo:OEO_00020012	study report
Range	Literal (dateTime)	

Label		
Entity	oeo:OEO_00390098	has doi
Definition	has doi is the relation between a digital object and the literal representing its doi (digital object identifier).	
Remark		
Domain	oeo:OEO_00020012	study report
Range	Literal (string)	

Label		
Entity	oeo:OEO_00390073	has scenario type
Definition	has scenario type is a relation between a scenario factsheet and a subclass of scenario.	
Remark	Subclasses or individuals of scenarios are allowed. As of now, no individuals exist.	
Domain	Objects have to be one of the entries in range.	
Range	oeo:OEO_00000365	scenario factsheet
	oeo:OEO_00000364	scenario
	oeo:OEO_00020247	target driven scenario
	oeo:OEO_00020248	explorative scenario
	oeo:OEO_00020314	reference scenario
	oeo:OEO_00020345	sufficiency scenario
	oeo:OEO_00020412	statistically robust scenario
	oeo:OEO_00030007	climate scenario
	oeo:OEO_00030008	economic scenario
	oeo:OEO_00030009	emission scenario
	oeo:OEO_00030010	energy scenario
	oeo:OEO_00020309	policy scenario
	oeo:OEO_00020411	robust system scenario
	oeo:OEO_00020317	greenhouse gas emission scenario
	oeo:OEO_00020321	CO2 emission scenario
	oeo:OEO_00020310	without measures scenario
	oeo:OEO_00020311	with existing measures scenario
	oeo:OEO_00020312	with additional measures scenario

Label		
Entity	oeo:OEO_00020222	has interacting region
Definition	An is-about-relation between a scenario and an interacting region to indicate an interacting region of a scenario.	
Remark	Objects are an URI of the type specified in the range.	
Domain	oeo:OEO_00000365	scenario factsheet
Range	oeo:OEO_00020036	interacting region

Label		
Entity	oeo:OEO_00020220	has study region
Definition	An is-about-relation between a scenario and a study region to indicate the study region of a scenario.	
Remark	Objects are an URI of the type specified in the range.	
Domain	oeo:OEO_00000365	scenario factsheet
Range	oeo:OEO_00020032	study region

Label		
Entity	oeo:OEO_00020440	has scenario year value
Definition	has publication date is the relation between a report and the year it was published	

Remark	in. Has scenario year value is a relation between a scenario factsheet and a xsd:dateTime value.
Domain	oeo:OEO_00000365 scenario factsheet
Range	Literal (dateTime)

Label	
Entity	oeo:OEO_00020437 has information input (shortcut)
Definition	A relation between a scenario factsheet and a dataset, where the dataset is an input to the scenario projection process the scenario factsheet is about. It is a shortcut relation, see elucidation and associated sparql axiom.
Remark	This is a shortcut relation to relate 'scenario factsheet' to 'data set'. The original relation 'has information input' relates 'scenario projection' (process) to 'data set'. The shortcut relation should be used to represents these statements: ('scenario factsheet' 'is about' some scenario) and ('scenario projection' 'is based on' some scenario) and ('scenario projection' 'has information input' some dataset)
Domain	oeo:OEO_00000365 scenario factsheet
Range	oeo:OEO_00030029 exogenous data

Label	
Entity	oeo:OEO_00020436 has information output (shortcut)
Definition	A relation between a scenario factsheet and a dataset, where the dataset is an output of the scenario projection process the scenario factsheet is about. It is a shortcut relation, see elucidation and associated sparql axiom.
Remark	This is a shortcut relation to relate 'scenario factsheet' to 'data set'. The original relation 'has information output' relates 'scenario projection' (process) to 'data set'. The shortcut relation should be used to represents these statements: ('scenario factsheet' 'is about' some scenario) and ('scenario projection' 'is based on' some scenario) and ('scenario projection' 'has information output' some dataset)
Domain	oeo:OEO_00000365 scenario factsheet
Range	oeo:OEO_00030030 endogenous data

Label	
Entity	oeo:OEO_00390094 has iri
Definition	has iri is a relation between a data item or document and the IRI that identifies it as resource on the internet.
Remark	Uuids are used for internal workings with the oekg.
Domain	oeo:OEO_00030029 exogenous data
	oeo:OEO_00030030 endogenous data
	oeo:OEO_00000172 framework factsheet
	oeo:OEO_00000277 model factsheet

Range	Literal (string)	
		Label
Entity	oekg:has_id	
Definition		
Remark	Uuids are used for internal workings with the oekg.	
Domain	oeo:OEO_00030029	exogenous data
	oeo:OEO_00030030	endogenous data
Range	Literal (integer)
